KRITI KUMARI SINGH

PRODUCT & VISUAL DESIGNER

New Delhi, India | +91 75037 73319 | kriti.singh92@gmail.com | linkedin.com/in/kritikumarisingh

ABOUT ME

Product Designer with a background in architecture, combining UX, visual design, problem-solving, and a strong artistic eye. I enjoy simplifying complex ideas and turning them into clear, thoughtful digital experiences that are easy to use.

EXPERIENCE

Product Designer - Hotstuff Labs Jan 2025 - Aug 2026

New Delhi, India · Sole designer, trading & DeFi platform

- Owned the **end-to-end product experience** of the Hotstuff platform - **information architecture, navigation, and complex trading flows** - taking work from user flows and wireframes through prototypes to shipped UI.
- Built and maintained the **product design system**, keeping the interface consistent as the team shipped and cutting rework during design-to-development handoff.
- Designed **responsive experiences** across desktop, tablet, and mobile, specifying empty, loading, error, and **edge-case states** so engineers never had to guess.
- Partnered directly with **founders and developers** to scope features, pressure-test feasibility, and ship against tight timelines as requirements evolved.
- Ran **competitor audits** across leading trading platforms to ground design decisions in established patterns and user expectations, then translated the findings into concrete product improvements.
- Defined the visual direction for **Hotstuff branding**, delivering the **logo, typography, colour system, illustration style, and brand toolkit** - then extended it across social, marketing assets, and banners.

UX Design Intern - Kormoan Jun 2024 - Sep 2024

New Delhi, India

- Designed SISTEM, a personal **finance and expense-tracking app**, from competitor research through **end-to-end wireframes** covering its **core structure** and financial workflows.
- Structured flows for **account linking, cash and bank tracking, expenses, transactions, budgets, and custom categories.**
- Designed **group expenses and bill splitting**, including group creation, member invites, and flexible expense-sharing rules.
- Mapped **recurring payments**, payment methods, transaction editing, and Sistem AI, translating dense requirements into clear, buildable user flows.
- Created **UI illustrations** in Adobe Illustrator for MissBliss, shaping the product's interface and visual language.

Architectural Designer - Anagram Architects · Space Aesthete · Zoera 2022 - 2024

New Delhi, India · Internships & professional experience

- Contributed to **residential and commercial projects**, developing spatial concepts, layouts, and design solutions from brief to detail.
- Produced **technical drawings, 3D models, renders**, moodboards, and presentations to develop and communicate design intent to clients and teams.
- Worked across **spatial planning, interior design, and architectural detailing**, balancing creative intent against technical and practical constraints.

EDUCATION

Bachelor of Architecture Aug 2018 - Jul 2023

MBS School of Planning and Architecture · Dwarka, New Delhi, India

SKILLS

Product Design UX/UI Design · User Flows · Wireframing · Prototyping · Interaction Design · Responsive Design · Design Systems · UX Research · Competitor Analysis
